- Mac OS

EXPERIENCE

Software Developer, Apprich Technology, March 2021-Current
Ujjain, India

- Developed and maintained robust web applications using the MEAN/MERN stack (MongoDB, Express.js, Angular, Node.js), ensuring timely project delivery
- Implemented RESTful APIs and microservices to enhance application functionality, scalability, and performance
- Designed and developed responsive user interfaces using Angular, React, HTML, CSS, and Bootstrap, focusing on usability and accessibility
- Integrated Angular Material, React Material UI components to improve UI design and functionality, enhancing user experience
- Leveraged Node.js for server-side development, managing backend logic and database operations efficiently
- Proficiently utilized MySQL and MongoDB databases for data storage, retrieval, and management
- Collaborated closely with cross-functional teams to analyze requirements, troubleshoot issues, and implement effective solutions
- Actively participated in code reviews, testing, and debugging processes to maintain high code quality and optimize application performance
- Utilized Git and GitHub for version control, ensuring seamless collaboration and efficient code management within the development team.

MEAN Stack Developer, Unicrafts - (E-commerce Application), April 2021-January 2023
Ujjain, India

- Unicrafts is a dynamic e-commerce platform tailored for home appliance products
- It empowers customers with intuitive browsing, searching, and purchasing capabilities
- Users can add items to their cart, create personalized accounts, and filter products by cost, brands, categories, and subcategories
- The platform includes a chat feature for customer support and enables sellers to register, offering products via both direct sales and a marketplace model
- Admin functionalities encompass order management, payment processing, customer support, and system maintenance.

Full Stack Web Developer, JOBSQO (Job Search Website), March 2023-February 2024
Ujjain, India

- Conceptualized and developed an innovative job-search website facilitating connections between job seekers and recruiters in Dubai
- Orchestrated meetings with recruiters to enhance opportunities for job seekers, bridging the gap between employers and talent

- Designed and implemented user-friendly features to streamline the job search process, optimizing user experience and engagement
- Collaborated with a diverse team of developers and designers to ensure seamless functionality and visual appeal of the platform
- Successfully marketed the platform to a targeted audience, increasing user base and visibility within the job market.

NodeJS Backend Developer, Quizzer App, February 2024-Current
Ujjain, India
- Developed a dynamic quizzer application for TechBirds, leveraging Node.js for backend development to manage quiz data efficiently
- Designed interactive and responsive quiz interfaces using Angular for the front-end, ensuring optimal usability across various devices
- Integrated MySQL for robust data storage and management, ensuring scalability and performance of the application
- Conducted rigorous testing and debugging to maintain high functionality standards and ensure a smooth user experience
- Collaborated closely with the TechBirds team to meet project requirements and deliver a feature-rich quizzer application on schedule.

EDUCATION AND TRAINING

B.Tech/B.E.
Computer Science, Mahakal Institute of Technology, Ujjain, Ujjain April 2020
- Percentage: 75%
- University/Board: Rajiv Gandhi Proudyogiki Vishwavidhyalaya, Bhopal

SOFTSKILLS

English, Hindi, Urdu
